

## STYSA Goal Inspection Form

Association:	Club:
Complex Name:	Complex Address:
Inspector:	Title:

**Inspect all Goal Posts and indicate by circling Y(es) or N(o) after determining:**

<b>Y N 1.</b> All open or broken hooks to which nets should be attached been removed.
<b>Y N 2.</b> Are there any rusted or weak places on any of the uprights or cross bars of any of the goals?
<b>Y N 3.</b> Are there jagged or sharp points or edges on any of the posts? (Fixed, portable, or small sided)
<b>4.</b> For posts in the ground:
<b>Y N (a)</b> Are posts rusted and weakened at the ground or just below ground level?
<b>Y N (b)</b> By pressing against and shaking the posts, are they securely in the ground?
<b>Y N (c)</b> Do posts appear to be approximately vertical and are not leaning significantly?
<b>5.</b> For goals with posts NOT in the ground:
<b>Y N (a)</b> Is the goal built so that it DOES NOT tip easily when weight is applied to the top or to the horizontal bar?
<b>Y N (b)</b> Is the goal built so that it DOES NOT tip or topple easily when the rear supporting part of the goal is raised?
<b>Y N (c)</b> Is the construction of the goal such that unless staked, it will tip or topple easily?

***Note: Please remember that a goal that requires staking to be stable, is easily un-staked. Therefore, any such goal should be removed and dismantled.***

**B. For all connections or intersections of pipe, inspect and determine that:**

<b>Y N 1.</b> Is any connection deteriorated or weakened by rust or fatigue?
<b>Y N 2.</b> Will each connection properly support the weight of the members it supports?

**C. Supporting braces, inspect and determine that:**

<b>Y N 1.</b> Are there rusted or weak places in the braces?
<b>Y N 2.</b> Are there jagged or sharp points or edges on the braces?
<b>Y N 3.</b> For supporting braces in the ground, are braces rusted and weakened at ground or just below ground level?

**For any goal found to have a problem, red tag or place a notice which is easily noticeable on the goal. Immediately notify, orally and in writing, the local association or any group responsible for the goal. Advise the association or group responsible of the specific problem observed and provide them with a deadline by which to make the necessary repairs. Reinspect after the deadline or the repair is done to insure that the repair has properly resolved the problem(s) observed.**
